### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Specification***

1. Applicant is requested to update the status of parent application 10/023,725.

***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Palmer ('411).

See Figure 7 and the Abstract. The phrase "obtained by molding" is a process limitation that does not distinguish the final product over that of the prior art.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilden et al. in view of Palmer ('411). The primary reference discloses the invention substantially as claimed, namely a skin of fiber-reinforced material with stiffeners arranged in rows on one surface, a fiber-reinforced material adhered to the skin and stiffeners, and ribs or frame members connecting the stiffeners; see Figure 2, column 1,

lines 20-25 and column 2, lines 27-55. However it does not disclose the use of stitching in the laminate. The secondary reference discloses the use of stitching in a laminate used in aircraft comprising rows of stiffeners on a skin layer; see Figure 7 and column 1, line 40 through column 2, line 49. Stitching is disclosed in the secondary reference as adding stability, increasing load capability, decreasing delamination of the laminate, etc.; see column 6, lines 49-59. It would have been obvious to one of ordinary skill in the art to add stitching to the laminate of the primary reference as taught by the secondary reference to improve structural properties of the laminate.
